It is. But it's also fun to seek and destroy by hand. Granted, sometimes I miss a space, as you saw right before this sentence started! ☺

I saw that. Seriously, it's easiest to view source, copy and paste into Notepad, search and destroy, and repaste into Drupal.

You've got an empty paragraph tag at the top of the photo.

Perfect—thanks, Rich!

I also added a picture from an article that Bill just sent me.

Thanks, everyone! Here's the latest version of the page:

No problem! Here it is so far; feel free to change ANY of the wording:

<https://wcms.epa.gov/region8/epa-gold-king-mine-release>

And I'm looking for better pictures; I'll add one once I find one that works better. The Durango Harold has a video where I might be able to use some stills.

Thanks,

Tim

Tim—can you set up a webpage called “EPA Gold King Mine Release” for possible use? I’m thinking of a format similar to Glendive spill where we can post updates for a while and direct folks to current statements and updates pulled from polreps. Keep it offline for now, I’ll send you some language in a bit.
